

## EnterpriseDX®

# Command Manager

## OVERVIEW

Command Manager saves you time by commanding bulk changes to your systems without using the clunky building controls interface.

Many enterprises are left with legacy systems with limited access to data or commanding, but still need visibility to those old systems.

Front-end access to the different control systems can be difficult, and in some cases, isn't available at all. Command Manager provides just the solution.

## FEATURES

- Command across multiple sites and multiple access types in minutes
- View, export and graph historical command changes
- Extend the capabilities and life of hardware

## EDX COMMAND MANAGER BRINGS REAL-TIME BUILDING COMMANDING TO YOUR DEVICE

EDX Command Manager puts the remote back in the control of your enterprise. Command Manager saves time commanding bulk changes to your systems without using the clunky controls interface. Reset your enterprise to corporate standards, or react to seasonal or other multi-location changes. Command Manager allows authorized users to remotely command set points for one or more locations, while building an audit trail for later analysis.

## EDX COMMAND MANAGER BRINGS EFFICIENCY TO YOUR ENERGY AND FACILITIES MANAGERS

## MULTIPLE PLATFORMS

Reduce the time and effort it takes to effect change across many locations and multiple control systems. Quickly and easily find and access the locations you want to change - based on system type, regional location, or parameters set!

## CREATE CUSTOMIZED RULES

Create and edit rules to prevent errors and streamline changes! Maintain compliance with corporate policies and prevent accidental changes to customer comfort.

## ACCESS ANYWHERE

Users can control set points and lighting from any browser, at work, at home, or wherever you are - providing easy access to all building controls!

For more information, please visit [www.phoenixet.com](http://www.phoenixet.com) or email [sales@phoenixet.com](mailto:sales@phoenixet.com)

**Scenario #1 - It's going to be warm on the East Coast and we will want to lower the set points by 2 degrees.**

## Command Manager RESOLUTION

- One login for all systems/locations from any web-enabled device 24/7/365 allowing visibility of real-time location status from anywhere in the world.
- Facility Manager can sort by regional location to specify where the changes will take place
- Facility Manager can now Command changes to all locations with the push of a button

Store	Location	City	State	System Type	Current kW	Current Weather
3601	3601 Princeton NC	Princeton	NC	Tritium Opus	177 kW	80 F
3602	3602 Matthews NC	Matthews	NC	Tritium Opus	112 kW	78 F
3603	3603 Charlotte NC	Charlotte	NC	Tritium Opus	24 kW	76 F
3604	3604 Greensboro NC	Greensboro	NC	Tritium Opus	184 kW	73 F
3605	3605 Greensboro NC	Greensboro	NC	Tritium Opus	175 kW	74 F
3606	3606 Gastonia NC	Gastonia	NC	Tritium Opus	0 kW	72 F
3607	3607 Kannapolis NC	Kannapolis	NC	Tritium Opus	122 kW	80 F
3609	3609 Wilmington NC	Wilmington	NC	Tritium Opus	138 kW	76 F
3610	3610 Winston-Salem NC	Winston-Salem	NC	Tritium Opus	103 kW	78 F
3615	3615 Cary NC	Cary	NC	Tritium Opus	211 kW	78 F
3616	3616 Raleigh NC	Raleigh	NC	Tritium Opus	140 kW	81 F
3620	3620 Durham NC	Durham	NC	Tritium Opus	174 kW	70 F
3625	3625 Asheville NC	Asheville	NC	Tritium Opus		

**Scenario #2 - Help, my corporate standards are a mess and my energy spend is out of control, I need to set.**

## Command Manager RESOLUTION

- Facility Managers have set points all over the place across the enterprise
- Facility Managers are able to instantaneously reset all location set points to a corporate standard or regional standard based on time, weather or other rules set in place
- All locations are quickly and easily changed to desired set point
