**Building Intelligence**

**PHOENIXET'S ENHANCED SMART BUILDING INTELLIGENCE PORTAL**

Building data is hard to gather and consolidate, because of legacy and proprietary building equipment. Energy and facilities teams rely on multiple data sources and manual consolidation to create trends and make decisions. You'll get a real-time summary of energy and dollar savings, cost avoidance, and your best and worst locations at a glance, without the time-consuming manual tasks. While the real-time analytics engine continuously monitors progress towards your smart building goals!

**VISUALIZE AND ANALYZE DATA FROM ALL YOUR BUILDING'S IOT DEVICES IN ONE PLACE**

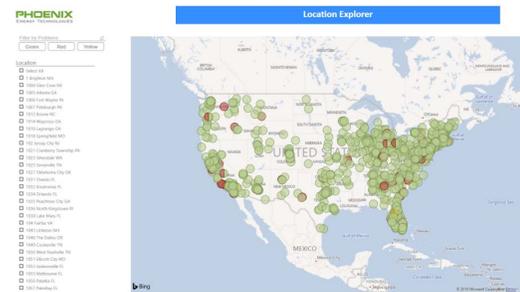

**10 PREBUILT REPORTS**

With reports executive summary, alarm and override, setpoint and zone temperature reports as well as demand reports, you're sure to find what you need.

**ENTERPRISE-WIDE BUILDING HEALTH**

Get the current state of your energy usage, comfort and calls/alarms across all your control systems and connected machines in a normalized dashboard. No conversion or legends required.

**ACTIVE REPORTING**

Automatically take corrective and proactive action based on data trends and anomalies.

**PhoenixET Energy Usage Ranking**

Location: Address, City, State/Prov, ZIP, CO2, kWh, Usage, District, TCU Control Options, Brand and Location/Type
